

FORKLIFT SAFETY — LIGHTS —

RED ZONE

The forklift Red Zone projects a bright red beam pattern onto the floor, and on either sides of the forklift, helping to promote greater workplace safety. The Red Zone is a visual indicator of the safe distance workers have to avoid foot injury and collision from rear-end forklift swing.

BLUESPOT LED

The Bluespot Spotlight will alert pedestrians and other forklifts to oncoming forklift traffic. The BLUESPOT can also help avoid accidents by allowing you to see the truck before it comes around corners and blind spots.
