

Since 1991, Hyundai has been a leader in the construction industry. They have developed a reputation for performance, durability, and affordability. We are proud to offer their equipment because we know there are multiple benefits to using Hyundai products.

Our selection of class 1 electric forklifts feature advanced performance design which has the capacity range of **3,000-10,000 lbs.** and is available in 3-wheel and 4-wheel models. The **100% AC electrical system** has a durable Prestolite motor and Zapi control system. The wet disc brake system is fully enclosed from dust and water, which gives it a superior life expectancy. The new models boast **30% improved visibility**, upgraded hosing and enhanced chains.

Drivers will enjoy the advanced ergonomic design featuring a full suspension grammer seat, spacious leg area with thick floor mat, low entrance strap and more. Although there are many superior features, our customers will enjoy the optional features of cold storage protection, "EE" Hazardous rating, fork auto leveling, and fingertip hydraulic controls. Because each of these pieces is best-in-class, the company offers an excellent comprehensive standard warranty which covers 3 years / 4,000 hours.
